

FREE SERVICES & IMPLEMENTATION PACKAGE

Switch from Airtable. We'll cover the move.

We want to build a trusted partnership and set you up for success. That's why your move will come with a **free services and implementation package**: monday experts will assess your Airtable environment, then build and test your new setup before anything switches over. Once everything is in place, they will train your team so everyone can hit the ground running.

-  Native import tools
-  Dedicated monday experts
-  Zero downtime
-  No cost to switch

HOW IT WORKS

The package includes:

Four steps, fully handled by our team, from your first record to your team's first day live.

STEP 01

Consultative data import

Our team guides every record out of Airtable using monday's native import tools, so nothing gets lost in the switch.

STEP 02

Full hands-on build

Our team rebuilds what worked in Airtable and improves what didn't, matching every board to how your team actually works.

STEP 03

Team training

Our team trains everyone on the new workflows, from champions to everyday users, and hands over full documentation.

STEP 04

Go-live support

Our team stays on hand to keep the transition on track, so your team never misses a beat.

THE CATCH?

There isn't one.

monday covers the import, the build, the training, and go-live. Your team keeps working, your budget stays where it is, and the whole switch is **on us**.
